

Fossil Match & Colouring

Draw a line between the name of the extinct animal or plant and the correct picture. Then colour in the pictures.

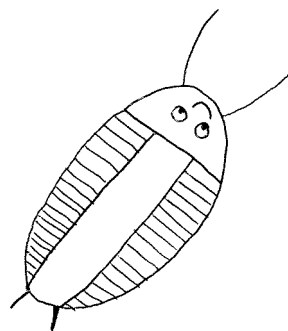

AMMONITE

Related to octopus and squid.
Their shells were full of gas and this helped them float in the sea.

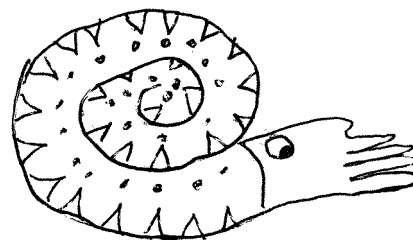

DINOSAUR

Reptiles that lived 200 to 65 million years ago. Some were tiny but others became huge.

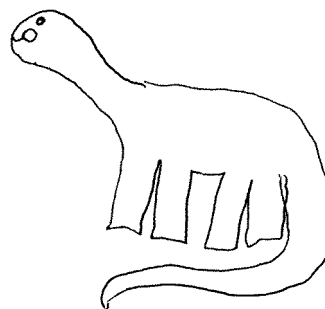

FERN

A plant found growing in swampy ground. Many were preserved in coal 300 million years old.

GIANT IRISH DEER

Died out only 10,000 years ago.
Male animals had large antlers 6 feet wide that they grew every year.

TRILOBITE

Lived in the sea 590 to 250 million years ago. They were divided into segments and had large eyes.
